

Water damage is one of the most common and expensive issues we see in homes. Often, it starts with a leak you don't even know about until it's too late. Reduce your risk of a slow leak and increase your chance of keeping your property protected.

Introducing the All Clear Leak Alarm

A leak alarm is a small but powerful device designed to detect unwanted liquid. The moment it senses a leak, it sounds an alert giving you an early warning before a minor leak turns into major damage.

Leaks don't just cause immediate damage, they lead to mould growth, structural deterioration, costly repairs, and ongoing issues for both homeowners and tenants. In many cases, insurance policies do not cover gradual or slow-developing water damage, meaning undetected leaks can lead to significant out-of-pocket costs for property owners.

A water leak alarm provides peace of mind by offering early detection. It allows you to act quickly, minimise damage, reduce repair costs, and protect your investment before minor leaks escalate into major, uninsured losses.

You can order via our website for fast delivery and a single flat rate shipping charge or if you need us to install the device/devices that's just \$69.95 + GST for the on-site service, with a report provided.

\$19.95
Excl GST

It is important to note that when this on-site service option is used in conjunction with either our Smoke Alarm Subscription or Casual Service, the installation fee will be waived and the device will be installed free of charge.

However, this offer does not apply to repair visits or between tenancy checks.

These alarms are ideal for high-risk areas such as under sinks, behind toilets, near hot water cylinders, washing machines, dishwashers, or anywhere a leak is likely to occur.

They're simple to install and require no plumbing or wiring.

Each unit is powered by a long-life 9V battery which is included in the device. It has an expected lifespan of around five years, eliminating the need for frequent battery changes. The device provides an audible alert when the battery needs replacing.

We also offer other specialised scientific services, contact us for more information. All pricing is GST Exclusive & subject to change without notice. Business hours: Monday-Saturday, 8am - 6pm (Excl. Public Holidays), after hours & weekend services are available - contact us for more information. A surcharge may apply for remote locations. Full terms of service are available on our website. Not all services are available in all regions
