

1. Summary:

The Fire Blanket is a high-temperature resistant safety device made from woven fiberglass fabric, designed to smother small fires by cutting off the oxygen supply. It is ideal for kitchen use, particularly effective on cooking oil and fat fires and can also be used to wrap around a person to extinguish flames on clothing or provide protection when escaping through fire.

2. Technical Parameter:

Material: Fiberglass woven fabric (fire-retardant)

Temperature Resistance: Up to 500°C

Size: 1m × 1m

Fire Classes: Suitable for Class A, B, and F fires in containers

Compliance: AS/NZS 3504

Mounting Height: Between 1000mm and 1500mm from the floor

3. Operation

- Pull down firmly on the quick-release tabs to remove the blanket.
- Open the blanket fully, keeping edges over your hands for protection.
- Gently place (do not throw) the blanket over the fire to completely cover it.
- Leave the blanket in place until the fire is completely extinguished and cooled.
- Dispose of the blanket after use (it is single use only.)

For personal protection:

- Wrap the blanket around the person whose clothing is on fire, or around yourself when moving through flames.

4. Important Notes

- Fire blankets are for small, contained fires only evacuate immediately if the fire grows.
- Install in or near the kitchen, but away from the stove or heat sources.
- Do not reuse a fire blanket once deployed or contaminated.
- Keep easily accessible and visible; do not store in cupboards or drawers.

5. Quality Guarantee

- This product is covered by a one-year warranty.
- Warranty excludes damage due to misuse, improper installation, or contamination.
- Dispose of used or damaged blankets responsibly – cut into smaller pieces before discarding.
